

### A. Record Custody Plane (runs inside each company)

Capture from  
existing systems

Hash and build  
Merkle root

Encrypt and  
store off-chain

Disclose one  
item with a proof

commit root hash and metadata

### C. Governance Plane (Hyperledger Fabric, shared by every member)

Identity service  
and audit trail

doccustody  
chaincode

reputation  
chaincode

fedmodel and  
Continuity Gate

candidate model up, gate decision down

### B. Learning Plane (raw records never leave the company)

Extract  
features locally

Train locally  
with replay

Robust aggrega-  
tion, clipping  
and noise

Candidate  
global model
